### 1 Conservatism in a probability task

#### 1.1 Group Members

1. Burak Aksoy
2. Jason Deichert
3. Kartiki Bhatnagar

#### 1.2 Introduction

Bayesian probability is an interpretation of the concept of probability, in which, instead of frequency or propensity of some phenomenon, probability is interpreted as reasonable expectation representing a state of knowledge or as quantification of a personal belief.

#### 1.3 Method

##### 1.3.1 Participants

There were a total of \_\_\_\_ participants that were randomly selected from the course PSYCH 363 in University of Waterloo.

##### 1.3.2 Apparatus

A laptop, desk and chair was used to conduct the experiment

### **1.3.3 Procedure**

Participants were brought in and asked to read the instructions presented on the computer. The instructions read " " and the probability of which side the ball is chosen from is guessed by the participant. The trials are done thrice followed by the data being saved in the computer.

## **1.4 Results**

## **1.5 Discussion**

## **1.6 Bibliography**
